

Water Quality Maintenance Schedule

Quick view Chart

• **BEFORE EACH USE** - Add 1 tablespoon of QB Brite or 1/2 teaspoon of QB Chlor to spa per 250 gallons.

• **ONCE A WEEK**- Add 1 teaspoon of QB Chlor to spa per 250 gallons. Add 1/2 tablespoon of SeQuest-All to spa per 250 gallons.

• **3 TIMES A WEEK**-Test water using chemical test strips. Adjust sanitizer (Chlorine or Bromine), pH and Alkalinity accordingly.

• **ONCE A MONTH** - Soak your filter elements overnight in a bucket with a spa filter cleaner and then rinse with clean water before re-inserting. (The Nature 2™ mineral element should never be cleaned in a filter cleaner. Just rinse with water.)

• **EVERY 120 DAYS**- Drain and refill your spa, replace with a new Nature 2™ element, repeat start up procedure.

• **AS NEEDED**-If water looks hazy, treat with 1 tablespoon of QB Chlor per 500 gallons.

Depending on bather load and frequency of use, drain and refill times may vary as well as the frequency of cleaning your filters.
